1. Enterprise Structures

This chapter covers the requirements and the customization details of the TRM which includes the creation of the additional data for the company code setting.

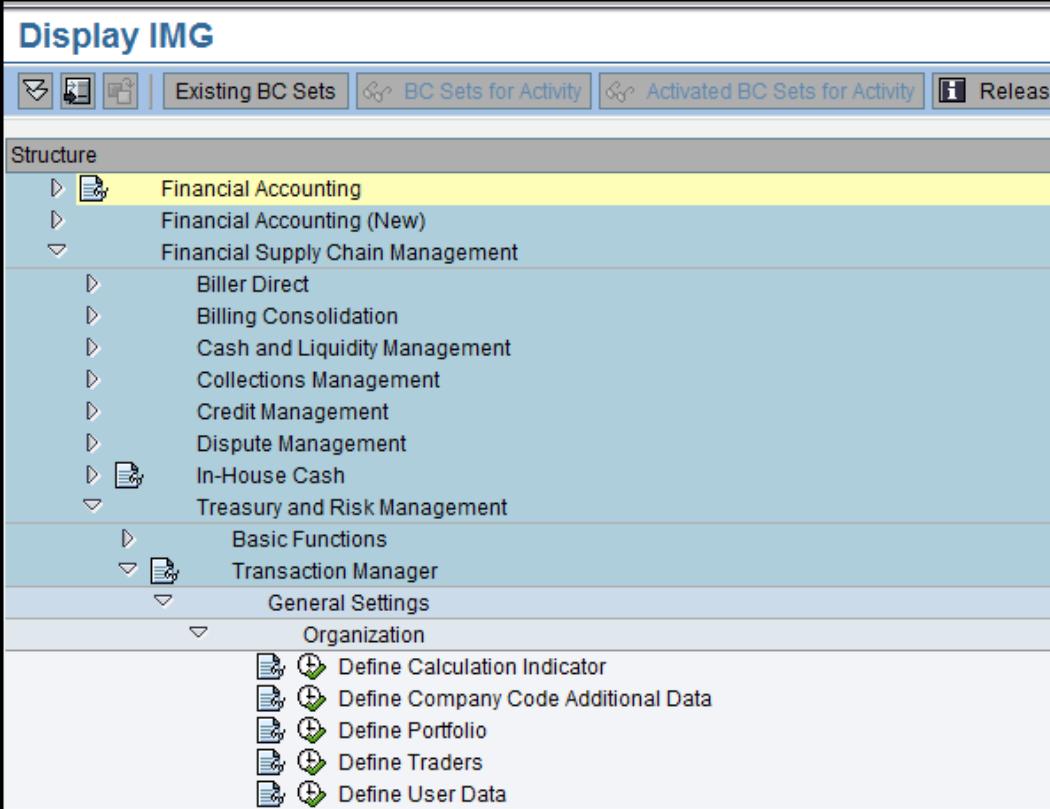

1.1 Define Company Code data

Menu Path	IMG → Treasury and Risk Management → Transaction Manager → General Setting → Organization → Define company code additional data
------------------	---

Purpose:-

In this step, we define company code configuration for Treasury and Risk Management

Transaction Code: - SPRO

The screenshot shows the SAP Display IMG interface. The title bar says "Display IMG". The toolbar has icons for search, copy, paste, and existing BC sets, followed by tabs: "Existing BC Sets", "BC Sets for Activity", "Activated BC Sets for Activity", and "Release". Below the toolbar is a breadcrumb trail: "Structure > Financial Accounting > Financial Supply Chain Management > Treasury and Risk Management > Transaction Manager > General Settings > Organization > Define Company Code Additional Data". The "Define Company Code Additional Data" node is highlighted in yellow.

INFO You can make generic entries for the valuation area, account assignment reference and currency. To do this, leave the fields blank.

For bank postings, you can substitute a predefined number (0-9) for each G/L position in order to select a bank clearing account, for example. You enter all 10 characters of the G/L account number and then use a "+" to mask those characters that are not to be predefined.
