Maintain HSN/SAC Code in SAP MM

HSN codes are used to classify goods to calculate GST. HSN stands for **Harmonised System of Nomenclature code**. This is a 6-digit code that classifies various products. Manufacturers, importers and exporters have been using HSN codes for a long time now. The HSN code contains 21 sections. These are divided into 99 chapters which are divided into 1244 sections.

It has about 5,000 commodity groups, **each identified by a six-digit code, arranged in a legal and logical structure**. It is supported by well-defined rules to achieve uniform classification.

HSN code is maintained **in material master through MM01/MM02 in control code in the tab "Foreign Trade Import"**. And its taxes against the condition type with combination of plant+material+region of CGST/SGST/IGST/UTGST.

For Example: -

What is the GST for rubber?

Rubber and Rubber Products Attracting 12% - 28% GST

HSN Code for Rubber & Rubber Products.
